SUMMARY

Software Developer with 3+ years of experience engineering high-traffic, production-grade applications. Proven track record of owning end-to-end feature development from frontend architecture to backend design, with a focus on performance optimization and user experience. Demonstrated measurable impact by reducing database query times by 50%, improving system capacity, and shipping high-traffic, client-facing features in fast-paced Agile environments.

TECHNICAL SKILLS

Languages: PHP, React, Python, C++, Java, SQL, JavaScript, TypeScript, HTML, CSS

APIs: RESTful APIs, GraphQL

Frameworks & Libraries: React.js, Next.js, Node.js, Redux, Selenium, Spring Boot

Databases: MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, Google Firebase

Performance: Splunk, Postman, PageSpeed Insights

Tools: AWS, Git, Jira, Confluence, MySQL Workbench, Visual Studio, PhpStorm

EXPERIENCE

Software Developer

January 2023 – February 2026

Paycom

Dallas, TX

- Led development of client facing pages with React and TypeScript to support high traffic volume, implementing advanced search, filter, and sort functionality.
- Developed robust APIs to integrate React frontend interfaces with PHP backend systems, optimizing large-scale data processing and improving overall system performance.
- Optimized backend data processing and SQL query performance, reducing server response times by 50% and significantly improving application scalability under load.
- Delivered production ready code in weekly sprints, collaborating in code reviews and QA cycles to ensure high quality, on-time releases.
- Investigated and debugged application bugs by analyzing logs, reviewing stack traces, and replicating errors.
- Collaborated with cross-functional teams to ensure timely delivery of project milestones.

Software Developer Intern

May 2022 – August 2022

Paycom

Dallas, TX

- Engineered a full stack internal analytics platform using React, TypeScript, and MySQL to track and visualize usage metrics for Paycom's UI Library.
- Transformed raw parsing data into interactive data visualizations, providing leadership with actionable insights into UI library adoption across engineering teams.
- Worked in an Agile environment to develop tracking systems for UI library usage, researching implementation patterns with senior engineers to improve frontend consistency and scalability.

Information Technology Intern

June 2021 – August 2021

Houston Health Department

Houston, TX

- Investigated and resolved technical discrepancies across network infrastructure, software systems, and peripheral devices to ensure department wide operational continuity.
- Provisioned and maintained proprietary software through regular updates and troubleshooting to support large scale user workflows.
- Optimized SQL queries for lab scientist sample testing, ensuring high data integrity and system stability during high-volume testing cycles.
- Mentored junior interns on technical best practices and debugging strategies, improving overall team productivity.

EDUCATION

Texas State University

San Marcos, TX

Bachelor of Science in Computer Science, Minor in Mathematics

August 2018 – December 2022
